

## Macro Niche Report:

# Body Piercing Niche

Body piercing is estimated to be a \$3 billion business a year industry and is projected to double or triple in the next few years. There are hundreds of **Micro Niche Markets** and thousands of related keywords within the Body Piercing Macro Niche. This makes body piercing a perfect niche for affiliate marketers.

**Description:** A body piercing is basically any piercing besides the standard earlobe piercing. It has become such a popular form of body modification that between five and ten percent of the population of the United States has indulged in at least one form of it at some time in their lives. In most cases, once a person gets a body piercing, they follow the first one with more. It is almost like getting one Tattoo and then another and then another. The most common body piercings are Belly Button, Tongue, Nipple, Nose and Lips rings and some that aren't so common that you'll just have to research that yourself.
